

FOR IMMEDIATE RELEASE

SS8 NETWORKS PARTNERS WITH PEN-LINK IN GLOBAL DISTRIBUTION DEAL TO CREATE INDUSTRY'S MOST COMPLETE LAWFUL INTERCEPT SOLUTION

Partnership combines best-in-class Lawful Intercept platforms to simplify purchase, installation and support of regulatory-compliant implementations

BARCELONA (3GSM WORLD CONGRESS 2006) – FEBRUARY 13, 2006 –

SS8 Networks, the leading provider of Lawful Intercept solutions for telecommunications service providers, today announced a global marketing, distribution and support agreement with Pen-Link[®] of Lincoln, Nebraska. The global agreement enables SS8 Networks to package Pen-Link's innovative monitoring and analysis software tools as part of its market-leading Xcipio[™] platform. Pen-Link has achieved broad recognition for its cutting-edge collection and reporting solutions that allow Law Enforcement Agencies (LEAs) to rapidly analyze and act on the critical information obtained during the lawful intercept process. With the combined solution, SS8 can now deliver complete or component solutions to network operators, governments and LEAs worldwide.

“This partnership between SS8 Networks and Pen-Link enables us to build on Xcipio's intercept capabilities for wireless, wireline, cable, packet data, VoIP and broadband data networks with a market-leading call data, content analysis and storage platform, providing a compelling one-stop-shop for lawful intercept solutions and expertise,” said Dennis Haar, president and CEO of SS8 Networks. “Coupled with our passive probe portfolio, customers now have the ability to select specific components or a complete solution from SS8. In this way, SS8 will play an even more critical role in how government agencies, local and state security organizations and international intelligence groups work with communication service providers to combat crime.”

The partnership expands SS8 Networks' portfolio to include Pen-Link's LINCOLN[®] 2 collection server, a high-end data collection and monitoring platform that stores and tracks activity of specific targeted individuals. SS8 Networks' customers also now have access to the Pen-Link 8 analysis software as part of the portfolio. This software

provides the ability to provide multi-dimensional analysis of target individual's telephone calls, emails, push-to-talk conversations and multimedia messaging — critical capabilities for law enforcement officials as suspect individuals continue to leverage IP-based network architectures and mobile devices for voice and other communication services.

“The partnership between SS8 Networks and Pen-Link combines two best-in-class solutions to create our industry's most powerful and complete lawful intercept solution,” said Mike Murman, CEO of Pen-Link. “We are delighted to partner with SS8 Networks to deliver a more comprehensive lawful intercept solution, leveraging our respective market leadership in North America while extending our combined reach into new and exciting markets worldwide.”

Network operators interested in learning how SS8 Networks Xcipio products can be used to enable compliance with regulatory mandates can see a live demonstration during the 3GSM World Congress 2006, February 13 – 16, on stand H41/H42.

About SS8 Networks

SS8 Networks provides a complete range of messaging, lawful intercept, and signaling solutions that enable network operators to optimize their investment in traditional, legacy networks while smoothing the transition to 21st century architectures. Through a series of extended relationships, lawful intercept solutions are now also available for government and law enforcement agencies worldwide. SS8 Networks' solutions are installed in global tier one wireless, wireline, VoIP and cable networks and are also available through a channel of major international switch vendors. SS8 Networks has been recognized and named a Red Herring 100 and AlwaysOn company in North America in 2005, for its innovation, quality of management, execution of strategy, and dedication to research and development. SS8 Networks is headquartered in San Jose, Calif., with offices worldwide. www.SS8.com.
