

FOR IMMEDIATE RELEASE

TELECOM INDUSTRY LEADER NAMED AS ADVISOR TO SS8 NETWORKS

New Advisor James E. Sylvester is 34-year Verizon Veteran

SAN JOSE, CALIF., November 20, 2006— – SS8 Networks®, a recognized provider of lawful intercept and unified messaging solutions for telecommunication service providers, announced today that James Sylvester, a well-known telecommunications industry executive, has joined the company’s advisory board.

In this new role, Sylvester will provide expert guidance based on his 34 years in the telecommunication industry, most recently serving as vice president, Systems Integration and Testing in Verizon’s Engineering and Technology Group until his retirement earlier this year. Prior to Verizon, Sylvester held positions at Bell Atlantic, AT&T and Bell Telephone Laboratories.

“SS8 Networks is incredibly fortunate to have access to the wealth of expertise of Jim Sylvester,” said Dennis Haar, president and chief executive officer at SS8 Networks. “He is truly one of the leading lights of our industry. Jim not only has a deep background in design and development of telecom systems, but he also is a leader in several areas that are extremely relevant to the continued growth of our company, specifically, privacy issues, regulatory changes, test lab operations and accreditation.”

Until his retirement from Verizon, Sylvester was a board member of the National Cooperative for Laboratory Accreditation (NACLA) who evaluates U.S. laboratory accreditation bodies that, in turn, certify the nation’s labs—everything from crime scene forensic labs to water testing to electrical system testing.

A holder of nine patents awarded or pending, Sylvester completed his MBA degree at the University of Chicago following a MSEE at Stanford University and BSEE at Kansas State University.

“When I retired from Verizon, I wanted to be involved with innovative companies that could significantly impact the future of the telecom industry. SS8’s mission to provide advanced unified messaging and lawful intercept solutions offers exactly that kind of opportunity,” said Sylvester. “I’m excited to be part of the SS8 team.”

About SS8 Networks

SS8 Networks provides a complete range of messaging, lawful intercept, and signaling solutions that enable network operators to optimize their investment in traditional, legacy networks while smoothing the transition to 21st century architectures. Through a series of extended relationships, lawful intercept solutions are now also available for government and law enforcement agencies worldwide. SS8 Networks' solutions are installed in global tier-one wireless, wireline, VoIP and cable networks and are also available through a channel of major international switch vendors. SS8 Networks was recognized and named a Red Herring 100 and AlwaysOn company in North America in 2005, for its innovation, quality of management, execution of strategy, and dedication to research and development. SS8 Networks is headquartered in San Jose, CA with offices worldwide. For more information please go to www.SS8.com.
