

**FOR IMMEDIATE RELEASE**

**INTELLEQ COMMUNICATIONS PARTNERS WITH SS8 NETWORKS FOR LAWFUL INTERCEPTION**

*PARTNERSHIP OFFERS CALEA COMPLIANT SOLUTIONS TO COMMUNICATION SERVICE PROVIDERS*

OKLAHOMA CITY, Okla., December 5, 2006 – Intelleg Communications™ Corporation, a provider of voice and data services to Carriers, Independent Phone Companies, ISP's and Cable Companies, announced today that it has partnered with SS8 Networks® to provide lawful intercept services for communication service companies throughout the United States.

"We chose SS8 as our partner because of their leadership, and expertise in providing lawful intercept solutions worldwide," says Marty Schell, General Manager for Intelleg. "Our CAPTURE services provide an affordable and flexible solution to communication service providers. We are in talks with many companies who wish to comply with the May 14<sup>th</sup>, 2007 CALEA mandate in a cost effective manner."

As a recognized provider of complete lawful intercept solutions, SS8's Xcipio™ products already help wireline, wireless, broadband, cable and internet service providers comply with FCC regulations for assisting law enforcement agencies under the CALEA legislation. "SS8 has built an envied reputation for providing standards-based solutions throughout North America," said Stephen Gleave, Vice President of Marketing for SS8 Networks. "This partnership allows Intelleg to immediately deliver CALEA compliance services, based on proven access and mediation technology, to their broad customer base."

The FCC's Broadband Second Report and Order, legislates that VoIP and broadband Internet Service Providers must be CALEA compliant by May 14<sup>th</sup>, 2007. Intelleg can now help these companies meet that deadline while minimizing their capital expenditures, lowering operational expenses and allowing them to allocate their resources to generating revenue rather than compliance policies.

About Intelleg Communications

Intelleg is a communications company that provides voice & data services to Carriers, Independent Phone Companies, ISP's and Cable Companies. They provide additional services to rural markets in order to bring value and increased services to those areas.
