

SS8 COMPLETES SUCCESSFUL WiMAX IMPLEMENTATION IN TAIWAN

Industry leader to showcase solution set at the Global Security Asia Exhibition and Conference

MILPITAS, Calif., March, 17, 2009 – SS8 (SS8 Networks, Inc.), a global leader of lawful intercept solutions for telecommunication service providers, law enforcement and intelligence agencies, has teamed with Gorilla Science and Technology to implement a WiMAX network for a Communication Service Provider (CSP) in Taiwan. “The industry expertise of SS8 coupled with Gorilla’s in-depth local knowledge of the CSP’s network infrastructure were critical for the successful WiMax implementation for our customer”, adds Mr. Joe Lin, Vice President, Solution Sales, Gorilla Science and Technology.

“This partnership combines best-of-breed technology and local market acumen”, adds TB Tan, SS8’s Vice President of APAC Sales. “From network analysis to physical implementation, we now have a seamless, integrated, end-to-end solution to offer our customers.”

Bolstering its commitment to the APAC region, SS8 will showcase their industry expertise and best-of-breed Lawful intercept solutions at Global Security Asia (GSA) 2009, in Singapore, March 17th – 19th. The GSA conference is a gathering of homeland security professionals and Lawful Intercept providers, meant to maximize the dividends that science and technology can yield and minimize the investment of time. By bringing these professionals together in a collaborative setting, countries can more readily and efficiently share best practices and technology solutions.

During the conference, SS8 will actively participate in the proceedings, exhibiting on the show floor (booth number 735), and delivering a key presentation. Dr. Cemal Dikmen, Chief Technology Officer for SS8, will present “The Distinct Roles and Values of an End-to-End IP Intercept Solution” on March 18th at 14:30. Dr. Dikmen will examine the unique capabilities and security benefits of a passive end-to-end solution: probe, mediation function and a reconstruction/playback element. He will describe how each component plays a crucial and specific role for the law enforcement agencies.

About Gorilla Science and Technology

Gorilla Technology Group helps organizations manage unstructured information and

increase ROI. Established in July 2000, Gorilla has three research labs and one solution center: Digital Content Signature (DCS) Lab, Content Processing Automation (CPA) Lab, Mega Information (MI) Lab, and Broadcast Solution Center. Gorilla has developed kernel technology in automation and specific content management and metadata extraction in various formats. Gorilla's open architecture Surveillance & Intelligence solution easily interfaces with different surveillance solutions.

About SS8

Headquartered in the heart of the Silicon Valley in Milpitas, California, SS8 has a global reach and is an independent provider of regulatory-compliant electronic surveillance solutions that have been deployed in over 25 countries for the largest wire-line, wireless, cable, VoIP and satellite service providers. These voice and data installations can already intercept more than 500 million subscribers, and serve local, regional and national law enforcement and intelligence agencies worldwide. SS8 products are sold and supported both directly and through OEM partnerships.
