

SS8 PARTNERS WITH Fox-IT TO PROVIDE STATE-OF-THE-ART IP ANALYSIS TOOL

*SS8 continues to expand portfolio, FoxReplay Analyst to be featured at ISS
Conference in Prague*

MILPITAS, Calif., September 17, 2008 – SS8 (SS8 Networks, Inc.), the global leader of lawful intercept solutions for telecommunication service providers and law enforcement agencies, has finalized a partnership with Fox-IT. SS8 will offer FoxReplay Analyst, an internet analysis system, to law enforcement agencies internationally.

SS8 and Fox-IT have been working together for the past several months to fully integrate SS8's Xcipio product with FoxReplay Analyst and provide an end-to-end IP intercept and analysis solution. "With the integration work complete and our first joint customer deployed, we are very eager to take this product to the broader market and our existing Xcipio customers," stated Dennis Haar, CEO of SS8.

"We are glad to be working with SS8 to offer a complete solution," offered Bert Hubert CTO of Fox-IT, "SS8's ability to 'reach into' the network and extract information from a wide range of technologies and equipment means FoxReplay Analyst will have a rich set of information to draw from."

"Today's internet is a highly dynamic and complex environment that requires a new approach to Internet analysis," added Cemal Dikmen, CTO at SS8, FoxReplay Analyst is an advanced system designed specifically for this new environment. It is used to recreate and analyze IP traffic. Today's on-line experience with multi-media interactions, pop-ups, spinning icons, live chat, voice calls and all kinds of other applications, presents numerous challenges to law enforcement when they try to recreate and understand the user's experience. The use of Ajax, Flash®, media players, XML and other Web 2.0 technologies is a radical departure from the pure HTML pages in the previous generation of the Web. Simple packet analysis tools have been utilized for years, but FoxReplay Analyst represents a significant leap in capabilities for recreating and analyzing the events of an internet session.

To see and learn more about Internet analysis, visit SS8 and Fox-IT as they work together at two upcoming industry conferences: ISS World Europe, Oct 1-3rd in Prague and ISS World Americas, Dec 9-11, in Washington D.C.

About SS8

Headquartered in the heart of the Silicon Valley in Milpitas, California, SS8 has a global reach and is an independent provider of regulatory-compliant electronic surveillance solutions that have been deployed in over 25 countries for the largest wire-line, wireless, cable, VoIP and satellite service providers. These voice and data installations can already intercept more than 100 million subscribers, and serve local, regional and national law enforcement and intelligence agencies worldwide. SS8 products are sold and supported both directly and through OEM partnerships.
