

COLLECT. MONITOR. ANALYZE. VISUALIZE.

### Empowering Law Enforcement with Actionable Intelligence

SS8 Networks provides the fastest and simplest way to collect, monitor, analyze, and visualize lawful intelligence data. For more than 20 years, we have optimized our solutions for Law Enforcement Agency (LEA) analysts and enabled them to turn complex data sets into actionable intelligence in real-time.

We help LEAs expedite their success despite the growing number of connected devices, methods of communication, and end-to-end encryption. We empower LEAs with simplified data management, real-time visualizations, and workflow-driven solutions purpose-built for analysts.

ACTIVE IN **35** COUNTRIES → COVERING MORE THAN **1 BN** SUBSCRIBERS

**6** OF THE WORLD'S LARGEST INTELLIGENCE AGENCIES USE SS8

**70%** MARKET SHARE US&UK

We are the top provider in the US and UK for Mediation and Monitoring platforms

**150** VENDOR INTERFACES

Proven network equipment interoperability with over 150 vendor interfaces to expedite deployment.

#### USE CASES

Evidence Gathering

Organized Crime Investigation

Counter-Terrorism

Financial Crime

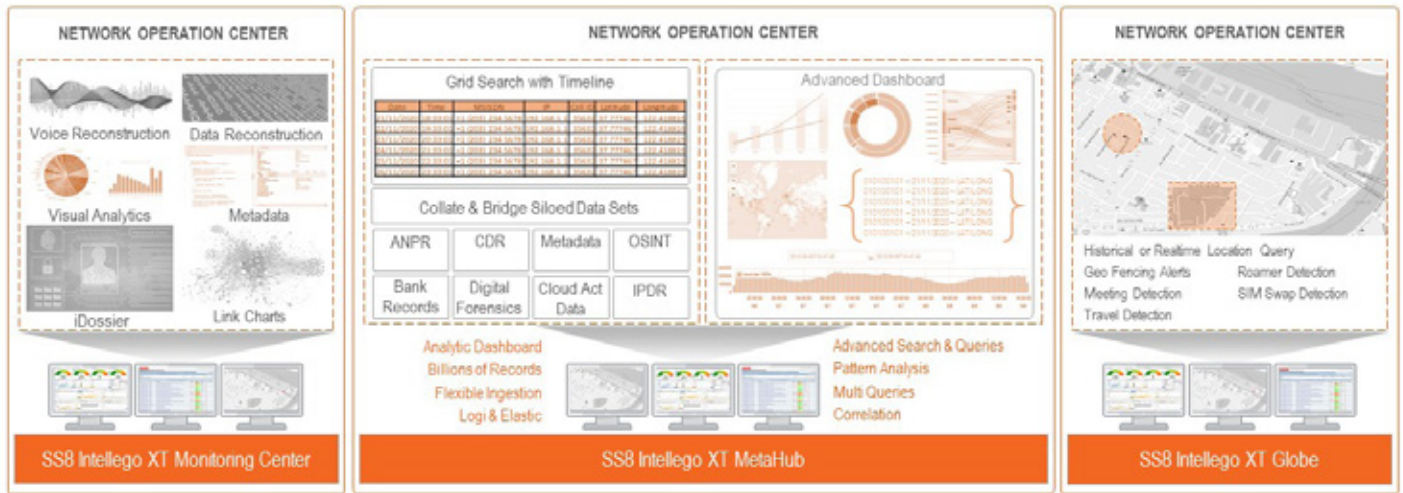

Security Operations

### Intellego XT

SS8's Intellego XT platform provides superior data monitoring, fusion and analysis solutions to help Law Enforcement and Intelligence Agencies combat crime.

A COMPREHENSIVE APPROACH TO LAWFUL INTERCEPTION

FEATURES:

**Create Comprehensive 'Digital Fingerprints' with Open-Source Intelligence**

We use 'Data Fusion' to ensure that communications traffic does not go dark due to encryption. Data Fusion combines 3<sup>rd</sup> party data sources (e.g. chat, social media, location, license plate scanners and others) to create a 'digital fingerprint' of a subject of interest. The use of open-source intelligence (OSINT) increases the chances of an operation's success.

**Simplify Evidence Submission and Auditing**

We enable you to store historic and real-time data for forensic analysis. This enables analysts to develop a comprehensive audit trail to support criminal prosecutions and submission of evidence.

**Discover New Links Between Multiple Data Sets**

We remove the data silos within an organization and enable an analyst to perform cross data set queries. This supports the discovery of links between communications data, location, time, and other criteria across multiple targets in a single and seamless platform.

**Visualize Real-Time Location-Based Intelligence**

We enable the visualization of location-based data and support alerts based on geo-fence technology. This enables analysts to gain an understanding of a subject's whereabouts in relation to physical locations, as well as other subjects of interest. It supports real-time response and proactive monitoring.

**Be Ready for 5G, IoT and New Communications**

We provide the scalability to manage massive growth in data associated with the adoption of 5G and Internet of Things (IoT) solutions. Analysts are able to ingest large volumes of data per target and can support the combination of data from multiple devices, IoT deployments and multiple communications channels.

**Rapidly Scale and Integrate 3rd Party Data Source**

The solution is designed around big data and scales accordingly. It offers cost-effective Cloud Native deployments in a highly scalable and modular architecture. Open APIs enable fast and easy integration with current and bespoke 3<sup>rd</sup> party data sources.

WHY CHOOSE SS8 NETWORKS?

- A. We are solely focused on enabling our customers to use lawful interception solutions to make the world safer and more secure with actionable intelligence.
- B. We enable our customers to be successful in a world that has more devices, data, encryption and means of communications than ever before and are continually evolving our solutions to match their needs.
- C. We enable our customers to maximize the potential of their investigations by combining a growing number of data sources in real-time, providing new levels of visibility.
- D. We are trusted by world-leading LEAs and Communication Service Providers (CSPs) because we enable them to deliver results and get the outcomes they need with simple and powerful solutions.
